Internship Report Day 1:
Designing a Web Page Using HTML

Name: Saliha Mehar

Internship Title: Front-End Intern

Company: ProSensia

Date: 23 June 2025

Purpose of the Report

As part of my internship, I was asked to watch a video titled "Designing a Web Page Using HTML" by Edureka. This report is a summary of what I learned, what I implemented from the video, and how this knowledge can be applied to real-world web development projects. I followed the entire tutorial step by step and tried out the code myself to better understand the basics of HTML.

What the Video About

The video started with a simple but clear explanation of what HTML is and how it's used to create the structure of a web page. It covered basic concepts like:

Setting up an HTML document with <html>, <head>, and <body>

Using headings, paragraphs, links, and images

Creating lists and tables

Adding a button with a basic onclick function

Writing internal CSS styles to make the page look nicer

What I liked most is that everything was explained in a very easy-to-follow way, and the instructor built a complete web page from scratch, which I also did along with the video.

HTML Code I Followed

Here's the complete HTML code I wrote by following the video:

```html
<!DOCTYPE html>

<html>

<head>

<title>My First Web Page</title>

<meta charset="UTF-8">

<style>

body {

background-color: #f2f2f2;

font-family: Arial, sans-serif;

margin: 20px;

}

h1 {

color: #336699;

}

p {

font-size: 18px;

}

.info {

background-color: #e6f7ff;

padding: 10px;

border-radius: 5px;
```

```
}

a {

color: #003366;

text-decoration: none;

}

table {

border-collapse: collapse;

width: 50%;

}

th, td {

border: 1px solid #666;

padding: 8px;

text-align: left;

}

</style>

</head>

<body>

<h1>Welcome to My Web Page</h1>

<p>This is my version of the HTML page after watching the Edureka tutorial. </p>
```

```html
<div class="info">

<h2>About Me</h2>

<p>I'm Saliha, currently doing a front-end internship at ProSensia. I created this page while learning HTML.</p>

</div>

<h3>My Favorite Links</h3>

</ul>

<h3>My Schedule</h3>

<table>

<tr>

<th>Day</th>

<th>Activity</th>

</tr>

<tr>

<td>Monday</td>
```

```html
<td>Watch HTML Tutorials</td>

</tr>

<tr>

<td>Tuesday</td>

<td>Practice Code</td>

</tr>

</table>

<img src="https://via.placeholder.com/300x150" alt="Sample Image">

<p>

<button onclick="alert('Thank you for visiting!')">Click Me</button>

</p>

</body>

</html>
```

Welcome to My Web Page

This is my version of the HTML page after watching the Edureka tutorial.

About Me

I'm Saliha, currently doing a front-end internship at ProSensia. I created this page while learning HTML.

My Favorite Links

- Edureka
- W3Schools
- MDN Web Docs

My Schedule

Day	Activity
Monday	Watch HTML Tutorials
Tuesday	Practice Code

What I Learned

HTML Structure: I now understand how to properly set up a webpage using the correct tags and structure.

Styling: I learned how to use internal CSS to style elements like headings, paragraphs, and tables.

Elements: I'm now comfortable using lists, tables, buttons, and images inside a webpage.

Interactivity: Even a simple JavaScript onclick made the page feel more dynamic.

Conclusion

Watching and following along with this Edureka video gave me a strong starting point in web development. I now feel confident in creating simple HTML pages and using basic styles and elements. This is just the beginning, and I'm excited to keep building on this knowledge in both my internship and future projects.
